(54) Title: ENCLOSURE FOR HARDWARE

(57) Abstract

An enclosure (1) for conduction-cooled hardware comprises a frame of corner pieces (2) and intermediate linking pieces (3). The corner pieces (2) (and maybe the pieces (3)) are formed by casting and machining. Panels are added to this frame to complete the enclosure (1). The corner pieces (2) have projecting portions that project through a significant distance. A range of different-sized linking pieces is provided so that different-sized enclosures can be assembled.

Codes used to identify States party to the PCT on the front pages of pamphlets publishing international applications under the PCT.
